

THE AGEAGLE UAV LAUNCHER

Lightweight, effective, affordable

A better way to launch valuable UAVs. Reduce launching problems associated with hand tossed UAVs

The AgEagle UAV Launcher

Feature	Benefit
Convenient and Portable	Lightweight and one person can assemble and operate the launcher in less than two minutes.
Required no external power source.	The AgEagle launcher is self-powered with latex rubber tubing requiring no bulky and expensive electrical, hydraulic or compressed air power source.
One person needed for UAV missions.	Hand launching usually involves two people; one person to launch and one to operate flight controls. With the AgEagle launcher, one person can do it all.
Catapult launches reduces problems associated with hand launching.	Hand launching a UAV often results in a crash. The AgEagle Launcher helps provide for safe, consistent flights while reducing the chance of personal injury to hands, fingers or facial areas.
Adjustable launch thrust and speed.	Can accommodate various UAV wing loadings and conditions.
Lock and launch carriage.	Some UAVs require the motor to be at full power prior to launch. The "Lock and Launch" carriage holds the aircraft firmly.
Precision laser cut components.	Smooth and precise operation. Long life functionality
Built with strong heavy gauge powder coated lightweight aluminum.	Easy to transport, carry and assemble. The powder coated surfaces protect against corrosion. Every component can be recycled, too!
Collapsible into a 4' long package	Fits easily into a trunk, back seat or pickup bed.
AgEagle parts and service.	Peace of mind knowing that wear parts and service related components can be purchased after the sale.
Field repairable.	The launcher is produced using many common materials. Simple tools make field service quick and easy.
Can be modified for flying wings or conventional aircraft*	Flexibility for future UAV designs.
One year workmanship warranty	Piece mind of knowing AgEagle will stand behind the product.
Made in the USA	High quality, strong and built for the long haul.
*NOTE: Due to the wide selection of UAVs, AgEagle does not modify the launcher for any specific UAV platform. Such modifications are the responsibility of the owner. AgEagle is not responsible for any damage to a UAV as a result of modifications or usage.
